Your child's asthma diagnosis:
answers to your key questions
about what's next

lungontario.ca/asthmachat

The Lung Association – Ontario is excited to share an excellent educational opportunity for parents with children diagnosed with asthma.

We are hosting a **FREE, LIVE** webcast on **Wednesday February 27th, 2019 at 12:00 pm EST**, that will cover many of the questions that parents have about asthma and how they can best support their child. We have an expert panel eager to provide information on clinical management, social matters, and how to live an active, normal life with asthma. There will also be an opportunity to ask questions in the moment through the webcast function.

Our expert panel includes Dr. Theo Moraes, a Pediatric Respiriologist and Clinician Scientist at the Hospital for Sick Children in Toronto; Susan Balkovec, a Registered Respiratory Therapist and Certified Asthma Educator in the Respiratory Medicine Division at the Hospital for Sick Children; and a parent whose child has been diagnosed with asthma.

We encourage you to join in yourself and share this invitation with others that would be interested in learning more about asthma in children. We've also included some sample social shares below.

Registration is easy... please [click here](#).
